SKILLS

Programming Skills: Python, JS, SQL(Azure/Cloud), C, C++, React, Flask, Node JS, Next JS, TypeScript, MongoDB, Supabase, GoLang, CI/CD, Docker, Kubernetes, Expo Go, React Native, Django, Postgres, DBT, AWS(Lambda), Java, Jest
Technical Skills: Microsoft Office Suite, WordPress, GCP, Google Analytics, AI integration, Figma, Canva, Framer, Capcut

EDUCATION

University of California, Los Angeles

Los Angeles, CA

Bachelor of Science in Computer Science

June 2023

- **Academics:** Cumulative GPA: 3.7, Dean's List Honors
- **Groups:** Delta Sigma Pi, Theta Chi, ACA, Powerlifting, ACM, Bruin Hyperloop
- **Coursework:** Algorithms, Machine Learning, Data Science, Computer Graphics, AI, Computer Systems Architecture, Programming Languages, Software Engineering, Operating Systems, Computer Networks, Statistics, Discrete Math

PROFESSIONAL EXPERIENCE

Tide Rock

San Diego, CA

Software Engineer

August 2025 - Present

- Built and deployed full-stack MVP (AWS, Snowflake, Clay, TypeScript, Python) to give live demos for clients/investors
- Implemented CI/CD pipeline and scalable deployment infrastructure, enabling ongoing feature development
- Engineered data pipelines to ingest, map, validate, and deduplicate budget data from multiple sources into Snowflake
- Refactored existing codebase, delivering 10+ REST API endpoints with authentication and optimized performance

Stacked

Los Angeles, CA

GTM Engineer

January 2025 - June 2025

- Defined messaging, pricing, and value propositions to improve platform use, leading to a 20% decrease in churn rate.
- Designed and implemented data-driven marketing campaigns, leveraging partnerships and social media to drive growth.
- Developed a dashboard tracking outreach campaign KPIs, providing insights into engagement and conversion rates.
- Spearheaded A/B testing initiatives to refine go-to-market strategies, successfully increasing social following by 150%.

Blue Modern Advisory

Los Angeles, CA

Software Engineer

June 2023 - January 2025

- Built a website for a career/GTM consulting firm using HTML/CSS, React, Tailwind, and Framer. [Link Here](#)
- Used AWS Bedrock and Lambda to prototype GTM AI automation tools tailored to the needs of each client.
- Designed/managed Supabase backend to store and process inbound data, tailoring solutions for client-specific needs.
- Reduced manual effort by 50% by implementing AI-driven reporting workflows and forecasting frameworks.

PROJECTS

AI Job Board

June 2025 - Present

- Full-stack AI-powered job board using Next.js, React, TypeScript, and PostgreSQL, integrating Claude and Gemini AI
- Designed scalable microservices architecture integrating auth. and payment (Clerk), file storage (UploadThing), email services (Resend), database management (Drizzle ORM), and a background processing system with Inngest. [Demo](#)

Voluntr

May 2025 - Present

- Developed full-stack social impact app that connects volunteers with meaningful opportunities, featuring event discovery, social networking, and achievement tracking to gamify and encourage community service participation.
- Used React Native, Expo, and TypeScript, implementing real-time features and complex state management. [Demo](#)
- Built a scalable backend using Supabase for user authentication, real-time data synchronization, and media storage.

LiftID

April 2025 - June 2025

- Built a React Native mobile app that uses AI to identify gym equipment and provide usage instructions. [Demo](#).
- Developed, trained, and deployed a custom machine learning model using Google Cloud Vertex AI.
- Designed and developed a Supabase backend supporting machine filtering and user features.
- Created an intuitive UI using React Native Paper and Tailwind, featuring tab navigation and real-time search.
